	DELIVERED (a)	INVENTORY (b)	WITH EXPIRED EMULSION DATE (c)		
16MM				16MM	
35MM				35MM	
8. NUMBER OF PAPER PRINTS					

INSTRUCTIONS  
(General)

## DEFINITIONS

As used in instructions covering this survey the term:

- "Agency" means a department or independent establishment of the Government.
- "Organization unit" means any unit of organization of an agency which performs microfilming operations or which has an inventory of microfilm equipment, or a superior organization unit which can supply the required data covering such microfilm operations or equipment.
- "Microfilm equipment" means microfilm cameras, automatic feeders, enlargers, automatic film-developing and film-printing equipment and microfilm readers used in filming and inspection processes. It does NOT include microfilm readers used solely to service an existing library of microfilm reels, or splicers, rewinders and manual type film-development kits.
- "Microfilming operations" includes rearrangement of records preparatory to filming, checking of accuracy of sequence of records preparatory to filming, removing staples and mending papers preparatory to filming, insertion of special targets, filming, film developing, film inspection, retakes and splicing, carton labeling and supervision; whether performed by your organization, other organization units within your agency, other agencies, or by private business under contract.

## BLOCK

1-4. Self-explanatory.

- Enter the total obligations incurred during fiscal year 1953 for microfilming operations, equipment or contract services opposite the appropriate object. This must include all obligations incurred regardless of budgetary classification or position title. Thus a mail clerk who spends 50% of his time operating a microfilm camera should have 50% of his salary included in the amount reported on line 5a. Under 5b and 5c do NOT include the cost of microfilm readers rented or purchased solely to service an existing library of microfilm reels.
- Show the number of rolls of raw stock negative film, in terms of 100' rolls, by size, delivered to your organization unit during fiscal year 1953.  
**NOTE:** Some film is packaged in 200' lengths. These should be reported in terms of 100' lengths.
  - Show the number of rolls of raw stock negative film, in terms of 100' rolls, by size, in inventory at microfilming project site, or elsewhere, e.g. warehouse or supply area, on date questionnaire is executed.
  - Show the number of those rolls of raw stock negative film entered under b which have an expired emulsion date.
- Show the number of duplicate film reels, such as positive, oxalid, etc., prepared from negative microfilm in possession of your organization unit during fiscal year 1953, by size.
- Show the number of paper prints made or purchased during fiscal year 1953.
